Perspex® Fluorescent Anti-Reflective has a fluorescent edge effect and a double sided textured surface.

It is ideal for a range of indoor POP/POS, architectural, design and display applications – from signs to shelving, from window displays to interior design.

With the added advantage of having the soft sheer surface texture on both sides of the sheet, punctuated by the striking fluorescent edge effect, the possibilities are endless.

LUCITE®
 The source of inspiration

We recommend Perspex® Fluorescent Anti-Reflective (AR) for indoor application only. Colours will fade over time with exposure to strong UV light. Samples are as photographic representation and may not accurately show transmitted colours.
