

Cast and Extruded Acrylic Tubes

Allplastics stock and fabricate a wide range of Clear Acrylic (PMMA) Tubes and Solid Rods.

Extruded Grade Tubes (XT) are more common and economic to use than the CAST Grade. They are both clear, bright and easily machined and polished.

CAST Tubes are perfectly clear and colourless, completely smooth and brilliant, excellent light transmission of 92 % (more than any plastic): high break resistance: exceptionally good resistance to weather conditions and aging.

We can also provide custom manufactured *coloured*, *satın finished* and *opal* Tubes or Rods
