

Allplastics Engineering Pty Ltd introduces
Polycarbonate Hardcoat Mirror Sheets

We are taking security mirrors to a whole new level!

Allplastics Engineering Pty Ltd has added **6mm thick Polycarbonate Mirror** sheets to its extensive range of architectural and building plastics. The silver Polycarbonate Mirror comes with a **hardcoat surface** making it ideal in applications such as horse stables, prisons, police stations, hospitals and similar projects where impact resistance is a prerequisite and constant cleaning or abuse can damage the sheet.

Polycarbonate is virtually unbreakable, offering impact strength of around **30 times** that of acrylic mirror, and over **250 times** the strength of glass in the same sheet thickness. Our polycarbonate mirrors are manufactured with the **industry's toughest protective back-coating** which helps to protect against scratching during general use or installations.

Allplastics offers the Polycarbonate Mirror sheets in the size of 2440 x 1220mm and 6mm thickness. Cutting and CNC routing to shape are one of the many services we offer.

In applications where high impact resistance is not required Allplastics Engineering offers both silver and coloured Euromir® acrylic sheets in a wide range of colours.

ALLPLASTICS ENGINEERING PTY LTD

Unit 20, 380 Eastern Valley Way, CHATSWOOD NSW 2067
