KS Polyolefin-Adhesive-Set

Application

K+S Polyolefin-Primer can be applied with the brush. Do not apply too much primer, because the adhesive effect is reduced.

Storage

Always close the bottle of K+S Polyolefin-Primer tightly after use. Stored in a dry place between 5 and 28°C, the product's storage life is approx. 12 months.

K+S MULTI-PURPOSE ADHESIVE/MAGNUMBOND can be stored at room temperature, however lower temperatures are advantageous for keeping the product in optimal condition. Under cool, dry storage conditions, the storage life is at least 12 months. However, when kept in cold storage, K+S MULTIPURPOSE ADHESIVE must be allowed to return to normal working temperatures before use.

Warning

K+S MULTI-PURPOSE ADHESIVE/MAGNUMBOND contains cyanoacrylate. Avoid contact with the skin or eyes, as the adhesive will glue such tissues together rapidly. Carefully separate glued-together skin by gently peeling it apart with a blunt object, preferably in conjunction with a bath of warm, soapy water. Rinse glued eyelids with warm water, keep damp by covering with wet gauze, and seek medical attention.

If K+S Polyolefin-Primer comes into contact with the eyes, rinse out thoroughly with water while gently holding the eyelids open and seek medical attention. Rinse splatter on the skin with water and wash the affected area with soap and water. In case of repeated contact with parts that have been treated with this product, wash hands with soap and water. If the primer is swallowed, rinse out the mouth with water, drink plenty of water and seek medical attention. K+S Polyolefin-Primer is highly flammable. Store the package in a well ventilated area. Keep away from ignition sources. Do not smoke. Do not inhale vapours. Do not allow it to enter the sewer system. Take precautions against electrostatic discharge. Keep the K+S Polyolefin Adhesive Set out of the hands of children.

Liability

No liability is assumed for any damage to persons or objects arising directly or indirectly from the use of the company's products or the use of information from our publications. Customers should satisfy themselves of the suitability of the products for the desired purpose through appropriate testing.
