See-Thru Two Way Mirror

Also called two-way mirror. A semi-transparent aluminum film deposited on the substrate allows a percentage of incident light to pass through while reflecting the remainder. From the illuminated side, it's a mirror. From the darkened side, it's transparent. Used for monitoring and surveillance operations.

- **Available in 2440 x 1220 x 3mm thick sheets**
- For projects from overseas, available in color
- Custom sizes and thicknesses also available

All mirror acrylic sheet is produced with a 1" overage on length and width.

FABBACK®

FABBACK® mirrored acrylic sheet features the industry's toughest protective back-coating. The durability of this sheet makes it virtually scratch-resistant during fabrication.
